### DETAILED ACTION

Applicants are reminded that to argue the FINAL restriction requirement a petition is the only proper response. However, to expedite prosecution, the application has been discussed with George Elliott (Quality Assurance Specialist) and Deborah Reynolds (Supervisory Patent Examiner), and the restriction sent 9-10-02, paper number 4, and the office action sent 12-31-02, paper number 6, have been vacated in favor of the instant restriction requirement (see attached Interview Summary).

### *Specification*

This application contains sequence disclosures that are encompassed by the definitions for nucleotide and/or amino acid sequences set forth in 37 CFR 1.821(a)(1) and (a)(2). However, this application fails to comply with the requirements of 37 CFR 1.821 through 1.825 for the reason(s) set forth on the attached Notice To Comply With Requirements For Patent Applications Containing Nucleotide Sequence And/Or Amino Acid Sequence Disclosures.

**The computer readable form (CRF) and sequence listing do not include the sequences on pg 34, lines 18 and 20. Nor do the sequences have SEQ ID NO.** Applicants must file a "Sequence Listing" accompanied by directions to enter the listing into the specification as an amendment. Applicant also must provide statements regarding sameness and new matter with regards to the CRF and the "Sequence Listing." Applicant is requested to return a copy of the attached Notice to Comply with the reply. Failure to fully comply with the

Art Unit: 1632

sequence rules in response to the instant office action will be considered non-responsive.

### ***Election/Restrictions***

This application contains claims directed to the following patentably distinct species of the claimed invention:

I) A method comprising administering an antiretroviral drug therapy comprising hydroxyurea and a reverse transcriptase inhibitor until viral replication is effectively suppressed, and then administering a gene delivery complex comprising foreign genetic material and a non-viral vector, wherein the complex has a specific affinity for a receptor on an antigen presenting cell;

II) A method comprising administering an antiretroviral drug therapy comprising a reverse transcriptase inhibitor and a protease inhibitor until viral replication is effectively suppressed, and then administering a gene delivery complex comprising foreign genetic material and a non-viral vector, wherein the complex has a specific affinity for a receptor on an antigen presenting cell; and

III) A method comprising administering an antiretroviral drug therapy comprising a reverse transcriptase inhibitor, a protease inhibitor and hydroxyurea until viral replication is effectively suppressed, and then administering a gene delivery complex comprising foreign genetic material and a non-viral vector, wherein the complex has a specific affinity for a receptor on an antigen presenting cell;

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Claims 1-13 and 17 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Claims 15, 16 and 18-21 are generic to a plurality of disclosed patentably distinct species of reverse transcriptase inhibitor. If applicants elect Group I, II or

Art Unit: 1632

III, Applicants are required under 35 U.S.C. 121 to elect a single disclosed species of reverse transcriptase inhibitor, even though this requirement is traversed.

Claims 18-21 are generic to a plurality of disclosed patentably distinct species of protease inhibitors. If applicants elect Group II or III, applicants are required under 35 U.S.C. 121 to elect a single disclosed species, of protease inhibitor even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Inquiry concerning this communication or earlier communications from the examiner should be directed to Michael C. Wilson who can normally be reached on Monday through Friday from 9:00 am to 5:30 pm at (703) 305-0120.

Questions of formal matters can be directed to the patent analyst, Dianiece Jacobs, who can normally be reached on Monday through Friday from 9:00 am to 5:30 pm at (703) 305-3388.

Questions of a general nature relating to the status of this application should be directed to the Group receptionist whose telephone number is (703) 308-1235.

If attempts to reach the examiner, patent analyst or Group receptionist are unsuccessful, the examiner's supervisor, Deborah Reynolds, can be reached on (703) 305-4051.
